SOUTHERNPINE Select Structural
a Temple-Inland product Lumber

Rigid performance properties demand the stiffest standards.

For over 100 years, construction professionals have relied on Temple-Inland® lumber products. For selection and quality. Stability and strength. Consistency and dependability. And now we're offering an even higher grade stamp. Temple-Inland select structural lumber provides the rigid performance properties demanded for key components in today's engineered trusses and wall systems. Available in 2" x 4", 2" x 6", and 2" x 8" dimensions and lengths from 8' x 20', this product minimizes knots, check, slope and other defects while maximizing structural strength, durability, value and material efficiency. When your applications call for the stiffest standards, call for Temple-Inland select structural lumber.
